The following is a statement of reasons for the indication of allowable subject matter: With respect to claims 1 and 16, the Prior Art does not teach a system for starting an engine and generating power while the engine is running, comprising: a permanent magnet motor a first phase controlled rectifier associated with the motor for selectively coupling the motor to a power source for providing power to the motor from the power source during an engine starting operation; and a second phase controlled rectifier associated with the motor for selectively coupling the motor to a load, for providing power from the motor to the load if the permanent magnet motor is coupled with the engine and rotating simultaneously with the engine_and the engine is running.

With respect to claim 9, the Prior Art does not teach A method of controlling power distribution using an engine starting system having a permanent magnet motor associated with the engine such that the motor and the engine rotate simultaneously, comprising the steps of: coupling the motor to a power source using a first phase controlled rectifier while starting the engine; and coupling the motor to a load using a second phase controlled rectifier to provide power generated by the motor to the load when the engine is running. Claims 1-20 are allowable.
